DATE MAILED: 01/14/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/063,401

Applicant(s)

O'KEEFE ET AL.

Examiner

Lincoln Donovan

Art Unit

2832

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-38 is/are pending in the application.
- 4a) Of the above claim(s) 3,5,8,16,17,20-22,25,33,34 and 36 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4,6,7,9-15,18,19,23,24,26-32,35,37 and 38 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Applicant Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 2. 6) ☐ Other: _____

DETAILED ACTION

Election/Restrictions

Claims 3, 5, 8, 16-17, 20-22, 25, 33-34 and 36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected claimed species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the response filed 10-31-03.

Applicant's election with traverse of the restriction in the response filed 10-31-03 is acknowledged. The traversal is on the ground(s) that the "reluctance is adjusted" rather than the trip. This is not found persuasive because the structures to adjust the reluctance, similar to the those to adjust the trip, are different necessitating differing search and/or considerations.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4, 6-7, 9, 18-19, 23-24, 26 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Mrenna et al. [US 6,194,982].

Mrenna et al. disclose a magnetic trip unit [figure 2] for actuating a latch [155], to trip a circuit breaker upon an overcurrent condition, the magnetic trip unit comprising:

Art Unit: 2832

- a first electrically conductive strap [69] configured to conduct an electrical current;
- a first magnetic u-shaped magnetic yoke [103, figure 10] proximate the conductive strap;
- a first armature [105] pivotally disposed proximate to the first magnetic yoke in operable communication with the latching mechanism;
- adjustment means [119, 199] for setting the distance between the yoke and armature, wherein the reluctance is adjusted to prevent saturation of the magnetic flux when current through the strap is a first number time the rated current of the circuit breaker and the reluctance is adjusted to promote saturation of the magnetic flux when the current through the strap is a second number time the rated current of the circuit breaker and the first number is greater than the second number and the reluctance allows increases in the magnetic flux across the magnetic path without saturating when the current through the strap is the first number time the rated current and the magnetic flux approaches saturation as the current through the strap increases towards the second number time the rated current.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-14, 27-31 and 37-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mrenna et al. in view of Montague et al. [US 5,670,922] or Daehler et al. [US 2003/0174033].

Regarding claims 10 and 27, Mrenna et al. disclose the instant claimed invention except for the yoke further including.

Montague et al. and Daehler et al. both disclose a u-shaped yoke piece [figures 14 and 2, respectively] having a pair of flanges extending from opposite ends of the u-shaped bight and a gap between the flanges to the armature.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the yoke design of Montague et al. or Daehler et al. for the yoke of Mrenna et al., for the purpose of increasing magnetic attraction upon saturation.

The specific size of the gap between the armature and yoke and the gap between the flanges and their respective relationship relative to each other would have been an obvious design consideration based on the desired sensitivity and rating of the breaker.

Claims 15 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mrenna et al. in view of Arnold et al. [US 5,381,120].

Mrenna et al. disclose the instant claimed invention except for the armature being attached to the conductive strap.

Arnold et al. disclose an armature member [42] mounted on a conductive strap [figure 5b] of a circuit breaker.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the armature mounting design of Arnold et al. for the armature of Mrenna et al., for the purpose of supporting the armature member.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Raabe et al., Grunert et al., Johnson et a., Edds et al. and Christensen.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is 703 308-3111. The examiner can normally be reached on M-F 8:30-5:00.

The fax phone number for the organization where this application or proceeding is assigned is 703-305-7724.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1920.
